

Thom Burt

Full Stack Developer Designer

Profile

I love coding in JavaScript, and have experience working with the full stack. JavaScript, React, Node.js, HTML and CSS are the tools I love to build with.

At my current company, I have done over 10 million dollars in sales and branded their new sub-branch.

I am currently enrolled in a coding course with Butler University, and am coming to the end of my time there. I have built working websites while on this course, both for myself and as a freelance, and am very excited about my future in the tech world.

Skills

Full Stack Web Development | Social media marketing | Facebook + Google ad management | Adobe Photoshop, Lightroom, After Effects and Premiere Pro | Online sales & marketing | Music production | Video production | Photography | Audio engineering Motion graphic design
